

Dear Swindon Borough Council,

We are writing to inform you that the students of Bradon Forest would like a bus shelter on Torun Way (on the opposite side of the road to Orchid Vale Primary school). This is because when it rains all the people at the bus stop get very wet and then they are wet for the rest of the day. As you know, we have had very bad weather in the past few months so this has happened too many times.

Arriving at school after being in the rain is having an impact on our education, as we are not able to concentrate and focus in class. Having a bus shelter will keep us from getting wet and will ensure that the chances of learning will be sustainable and sufficient. Schools at the moment have attendance targets and having a bus shelter will avoid any unnecessary illnesses.

The students of Bradon forest were so wet and cold that one student's hands turned blue. As you know the British weather is very unpredictable; therefore, some pupils do not bring coats and get very wet waiting for the bus. You have a responsibility as Swindon council to ensure that everyone in Swindon is well-looked after and cared for.

In conclusion, we would like a bus stop on Torun Way (on the opposite side of the road to Orchid Vale Primary school). We appreciate that funds are tight, but we would love it if you could spare some money for a new bus shelter that not only serves Bradon Forest students but the whole community.

Yours sincerely,
