## APPENDIX 1 RISK ASSESSMENT METHODOLOGY

Potential hazards which have been identified are each given a “risk rating” based on the “likelihood and severity” using a 4 x 4 matrix as shown below. Proposed actions are identified, which mitigate each task hazard. The risk rating is then re-evaluated, assuming implementation of the control measure.

The four levels of “severity” are fined as:

<b>HARMLESS</b>	Not known to cause any harm
<b>SLIGHTLY HARMFUL</b>	Superficial injuries, dust irritation, temporary discomfort
<b>HARMFUL</b>	Lacerations, burns, concussion, sprains, RIDDOR reportable
<b>EXTREMELY HARMFUL</b>	Amputations, major fractures, fatal injuries

The four levels of “likelihood” are defined as:

<b>EXTREMELY UNLIKELY</b>	Not known to have happened at work. Frequency of occurrence is much less than once in 10 years.
<b>HIGHLY UNLIKELY</b>	Frequency of occurrence is less than once in 10 years.
<b>UNLIKELY</b>	Has happened before and/or is likely to occur within next 10 years
<b>LIKELY</b>	Event to be expected within the next 12 months

The matrix of severity and likelihood to determine the “risk rating” is defined as:

	<b>EXTREMELY UNLIKELY</b>	<b>HIGHLY UNLIKELY</b>	<b>UNLIKELY</b>	<b>LIKELY</b>
<b>HARMLESS</b>	<b>NO RISK</b>	<b>TRIVIAL</b>	<b>TRIVIAL</b>	<b>TOLERABLE</b>
<b>SLIGHTLY HARMFUL</b>	<b>TRIVIAL</b>	<b>TRIVIAL</b>	<b>TOLERABLE</b>	<b>MODERATE</b>
<b>HARMFUL</b>	<b>TRIVIAL</b>	<b>TOLERABLE</b>	<b>MODERATE</b>	<b>SUBSTANTIAL</b>
<b>EXTREMELY HARMFUL</b>	<b>TOLERABLE</b>	<b>MODERATE</b>	<b>SUBSTANTIAL</b>	<b>INTOLERABLE</b>

The definitions for the “risk ratings” are defined as:

<b>NO RISK</b>	No action required. No documentary records kept other than risk assessments.
<b>TRIVIAL</b>	No action required. No documentary records kept other than risk assessments.
<b>TOLERABLE</b>	No additional controls are required. Considerations may be given to a more cost-effective solution or improvement that imposes no additional cost burden. Monitoring is required to ensure that the controls are maintained.
<b>MODERATE</b>	Efforts should be made to reduce the risk, but costs of prevention should be carefully measured and limited. Risk reduction measures should be implemented within a defined time period. Where the moderate risk is associated with extremely harmful consequences, further assessment may be necessary to establish more precisely the likelihood of harm as a basis for determining the need for improved control measures.

**APPENDIX 1**  
**RISK ASSESSMENT METHODOLOGY**

<b>SUBSTANTIAL</b>	Work should not be started until the risk has been reduced. Considerable resources may have to be allocated to reduce the risk. Where the risk involves work in progress, urgent action should be taken.
<b>INTOLERABLE</b>	Work should not be started or continued until the risk has been reduced. If it is not possible to reduce the risk even with unlimited resources, work has to remain prohibited.
