

POS REPORTING

Since the reporting system went live at the end of October, **237 jobs** have been logged. The graphs below show the status, job type and timescales:

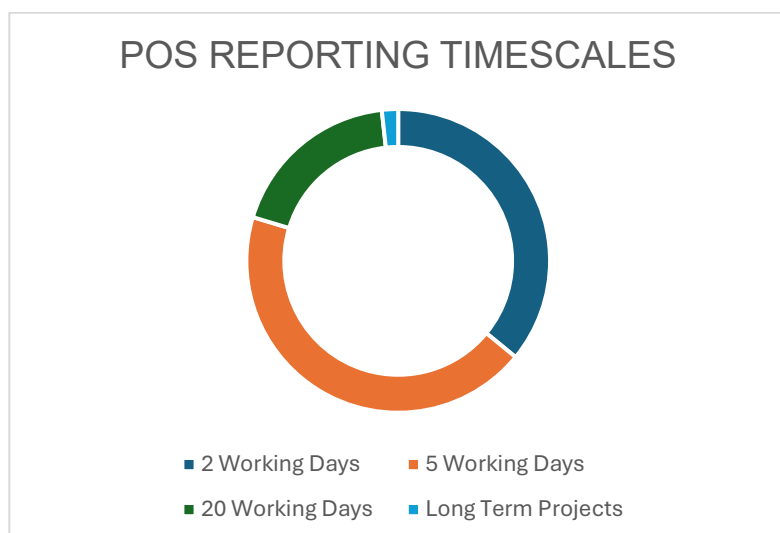

Live examples:

- Recently added to the system in the past 5 working days
- Larger project work
- Awaiting tree survey
- Tree roots
- Larger tractor required

'Other' examples:

- Paint Spillages
- Land ownership
- Parking issues
- Gritting
- Drainage
- Flooding
- Leisure Gardens
- SBC x 5 referrals

The POS Team is updating the administrators every Friday morning to ensure the system is showing live data.

The Team is still tweaking the system slightly as and when problems arise – working with Councillor Vinay Manro on solutions.

The system is more intuitive than the previous spreadsheet version, and the weekly folders ensure the Head Groundsman is aware of all incoming work.
